

Panther180 - Research/Grants Activity Data

The following document provides detailed information about the sponsored research data loaded into Panther180 from the Office of Research & Economic Development (ORED).

Awards active as of July 7, 2009 processed through ORED are loaded into Panther180 and have an activity classification source field in Panther180 of 'ORED'.

Note: Awards not processed through ORED or not active as of July 7, 2009 should be entered manually. Proposals submissions that are pending/not funded are also not interfaced into Panther180 at this time. This information should also be entered manually into Panther180.

Below are screenshots of the Panther180 input screens with tables containing more detailed information about each data element.

The ORED entries are not editable in P180 because subsequent loads of the ORED data would overwrite any manual updates made. An enhancement is being considered to allow faculty in the future to mark the specific entries (manual vs ORED) to be used for different purposes in Panther180.

If you have any questions or comments related to the ORED data, please contact Panther180 support.
